

Dr. Monroe grew up in Massachusetts before moving to Clinton, New York where he received his bachelor's degree from Hamilton College. He then worked for three years in pediatric imaging research at the Children's Hospital of Philadelphia. He continued his education at the University of Massachusetts where he obtained his medical degree. Dr. Monroe then moved to Colorado and completed his postgraduate training at the University of Colorado Hospital in Diagnostic & Interventional Radiology with fellowship training in Vascular & Interventional Radiology.

Dr. Monroe has significant experience in caring for patients with hepatobiliary disease including portal hypertension and hepatocellular carcinoma (HCC) and has extensive training in liver-directed therapy for HCC including radioembolization (Y90) and chemoembolization (TACE). He also has a strong interest in treating venous disease and is experienced using several novel devices for helping patients with debilitating venous thrombosis/insufficiency.

When Dr. Monroe is not working, he enjoys spending time with his wife and toddler son. They have a love for the outdoors and open space, which brought them to Colorado. He is grateful to continue to live and work in Colorado and enjoys skiing, hiking and biking.
