

Dr. Tom Alexander grew up mostly in Louisiana and Texas before settling down in New Orleans to attend college where he received his bachelor's degree from Louisiana State University (LSU). He was displaced by Hurricane Katrina but was later able to return to LSU—New Orleans School of Medicine and obtain his MD. Dr. Alexander's postgraduate training in diagnostic radiology was completed at Louisiana State University in Shreveport, LA before he concluded his training with a fellowship in breast and oncological imaging from Memorial Sloan Kettering Cancer Center in New York, NY.

Dr. Alexander is proficient in all modalities of breast imaging and looks forward to practicing in Colorado. His main focus is to find breast cancers at the earliest stage possible and to personalize screening as indicated by the patient's risk of breast cancer.

When he is not working, Dr. Alexander enjoys spending time with his wife and two young sons. As a family, they look forward to spending their free time biking, hiking, and exploring all the amazing outdoor opportunities available in Colorado and the surrounding area.

For more information about Advanced Medical Imaging Consultants' radiologists or services, please contact Andi Dresen, Client Services Manager, at 970-484-4757.
